## About Us

---

Isri Solutions is an IT service and consultancy provider that offers its clients comprehensive digital solutions. We work with modern technology to deliver highly professional and creative tech services with expertise in a wide array of fields.

Isri Solutions understands the intention of its clients to provide both sophisticated and aesthetically pleasing designs. We boast of providing responsive website designing and development services, graphic designing and logo designing services, video editing, visual effects and much more. We work with both front-end and back-end solutions for web and mobile.

We provide consultancy such as strategy planning, brand identity, social media advertising and content planning. With our team of experienced professionals, we offer our clients services in information architecture, art direction, identity design and concept creation.

Our mission is to assist you in materializing your vision and to create pleasant experiences. We aim to achieve and maintain our industrial growth as a global IT service and consultancy.

## E-commerce Platform

Our goal is to provide an E-commerce platform that is focussed on providing a secure, seamless experience to the customers and merchants. With features incorporating easy inventory managements, SKUs, product categorisations and sales analysis reports, the platform should make it simple for merchants to organise their products and evaluate performance. In addition, an easy and minimal navigation of the platform makes it easy for customers to simply process their purchases and explore related products. Our team is dedicated to develop the perfect ecommerce platform to suit your needs.

Description	Price	Quantity	Amount
